PARATECH®

For more than 60 years, Paratech has been combining innovative design with cutting edge technology to provide the highest quality and most user-friendly tools available for rescue and beyond. From the world's most advanced collapse support solutions to some of the world's strongest forcible entry tools, Paratech makes technical rescue operations simpler, safer and more productive.

Our product lines are comprised of Rescue Support Systems, MAXIFORCE® Air Lifting Bags, The MULTIFORCE® Air Lifting Bag, Powered Impact Tools, Forcible Entry Tools, Rescue Air Cushions, and the ultimate collection of essential Paratech products...the TRRU™ ...

Technical Rescue Response Trailer equipped specifically for either urban search and rescue or trench rescue, both are loaded with all of the necessary Paratech tools needed for technical rescue.

Paratech products are extensively used by fire departments worldwide including, but not limited to: all major U.S. cities, Copenhagen, Tokyo, London, Lyon, Madrid, Singapore and Istanbul. In addition, they have been selected by disaster agencies in the United States, Denmark, Japan, United Kingdom and Turkey as the standard for their rescue teams and technical rescue caches.

PARATECH®

Training & Tactics Courses

Paratech is a firm believer that Instruction in Rescue operations should be delivered by companies specialized in doing just that.

We have received requests from customers around the world to provide instruction specific to Paratech Products – The Paratech Training and Tactics program delivers this in two ways: the Paratech online Workshops and through our comprehensive Training and Tactics program where we have partnered with some of the best Instruction Companies around the world, use QR code for quotes and further informations.

Rescue Support Systems

The Paratech Rescue Support System

The Paratech Rescue Support System is truly a “go anywhere” system. Designed to be effective for the simplest to the most demanding deployment, there isn’t a more comprehensive, scalable and straightforward system than Paratech’s. Whether you choose the precision of the AcmeThread Strut, the automatic locking collar of the LockStroke Strut or the added length of the LongShore Strut, they are strong and versatile enough for nearly every collapse and stabilization scenario.

The entire system includes 5 sizes of AcmeThread Struts, 4 sizes of LockStroke Struts, 3 sizes of HydraFusion Struts, 4 sizes of AcmeThread/LockStroke Extensions, 5 sizes of LongShore Struts, 4 LongShore Extensions and over 20 interchangeable base plates designed to support a wide variety of contact points. All aluminum alloy components of the Rescue Support System are hard coat anodized to reduce electrical conductivity and increase strength and durability.

Truly a system that will not stop growing, Paratech’s Rescue Support System can be used in excavation collapse (trenches, mines), vehicle stabilization, structural collapse and reinforcement, or wherever there is a need for quick, strong and safe vertical or horizontal shoring.

Structural Shoring

Earthquakes, construction collapse, cave-ins, floods and structural fire damage require a collapse rescue system designed for the purpose of extracting victims in a safe and timely manner.

Vehicle Stabilization

Paratech Vehicle Stabilization Kits have the strength and flexibility to handle any size vehicle anytime, anywhere. This includes sub compact cars, buses, cement trucks and even locomotives. Additionally, these components provide the extra value of being completely interchangeable with your other Paratech equipment for building collapse and trench rescue scenarios.

Trench

Trench Shoring

Paratech’s pneumatic Rescue Struts allow for remote placement and easy locking as well as safe, remote removal. Used in combination with our Waler System, trench rescue has never been faster, easier or safer.

Special Applications

To be used in combination with Paratech’s LongShore, AcmeThread and LockStroke Struts, a wide variety of bases and accessories are available to assist in numerous special application scenarios. These include, but in no way are limited to: elevator shaft access and victim retrieval, high angle applications, confined space work and trench rescue.

Add-on kits include: Tripod, Bipod, Monopod and Elevator Support Unit Kits.

AcmeThread Strut

The Paratech AcmeThread Struts are comprised of a 2½"/6.35cm diameter Acme threaded aluminum movable solid shaft that extends out of a 3"/7.62 diameter aluminum tube. The AcmeThread is a square thread that allows full surface contact of the shaft through the collar and the collar full surface contact on the tube to transfer load directly to ground. AcmeThread Struts can be extended manually or pneumatically with air, carbon dioxide or nitrogen.

Place strut into position, 'EXTEND' threaded shaft into desired length, 'SPIN' collar to 'LOCK' the strut.

It is as easy as...

EXTEND & SPIN TO LOCK

Adjustments to the threaded shaft can be made in ANY increment up to the maximum length of the strut.

LockStroke Strut

The Paratech LockStroke Struts are comprised of a 2½"/6.35cm diameter grooved solid aluminum movable shaft that extends out of a 3"/7.62 diameter aluminum tube. LockStroke Struts have a ball bearing filled collar that locks automatically when the shaft extends either manually or pneumatically with air, carbon dioxide or nitrogen.

'SET' strut into position, 'EXTEND' strut with air or manually and the strut 'LOCKS' automatically.

It is as easy as...

SET, EXTEND TO LOCK

LongShore Strut

The Paratech LongShore Struts are comprised of a 3" diameter threaded aluminum movable shaft that extends out of a 3½" diameter aluminum tube. The square thread allows full surface contact of the shaft through the collar and the collar full surface contact on the tube to transfer load directly to ground. LongShore Struts can be extended manually or pneumatically with air, carbon dioxide or nitrogen.

Place strut into position, 'EXTEND' threaded shaft into desired length, 'SPIN' collar to 'LOCK' the strut.

It is as easy as...

EXTEND & SPIN TO LOCK

Adjustments to the threaded shaft can be made in ANY increment up to the maximum length of the strut.

HydraFusion Strut

The Paratech HydraFusion Struts (AcmeThread) are comprised of a 3" diameter threaded aluminum shaft that extends hydraulically out of a 3 1/2" diameter aluminum tube. The hydraulic lift capacity is 10 U.S. tons with a 2:1 safety factor. Once the strut is extended, the AcmeThread collar is spun down to the locked position and creates a 20,000 lbs. 4:1 safety factor for stabilization.

Place strut into position, 'EXTEND' threaded shaft into desired length, 'SPIN' collar to 'LOCK' the strut.

It is as easy as...

EXTEND & SPIN TO LOCK

Adjustments to the threaded shaft can be made in ANY increment up to the maximum length of the strut.

Elevator Support Unit Adapter Kit

Paratech's Elevator Support Unit (ESU) safely stabilizes an elevator and prevents it from moving. When deployed, the ESU causes zero to minimal damage to elevator cars and affords rescue teams precious time to extricate passengers and save lives. Two unique rescue base and end Plates form the core components of this system. An Angled Rubber Base attaches to either Rescue Strut and grips the

floor, while the Elevator Support Arm attaches to the top of the Rescue Strut and hooks under the elevator car.

Trench Cushion Kit

Designed to tackle one of the biggest challenges in trench collapse rescue, this kit includes the equipment you need to support your shoring panels quickly and safely. With our system you can significantly reduce the time needed to backfill your shoring panels and maintain a vertical surface for support. Included in the kit are two low pressure cushions, 22-887010K with 3.3T(3,0t) capacity and 22-887015K with 5.1T(4,7t) capacity, that can fill up to a 24 in (61 cm) void. Each cushion is fitted with straps for ease of lowering into the trench and help in positioning the cushions along the sides of the trench wall. Combined with our Paratech Rescue Struts this kit will equip you with the right tools for your next trench rescue.

Solid Sole Rakers & Accessories

Paratech offers the necessary accessories to convert our LongShore Struts into a fully deployable raker system that is fast, strong and easy to install. Paratech's innovative Raker accessories and LongShore Struts meet US&R requirements for strength and deployability. The Paratech LongShore System offers unique features and benefits ensuring proven performance every time the system is deployed.

Absolute Raker

Paratech once again sets a new standard, no wood, no pins, no chains...no hassle. The Absolute Raker provides flexibility, functionality and economy.

Never worry about wood again—fully deployable in minutes—or easily turn your existing Paratech Raker into an Absolute Raker, with the Standard to Absolute Upgrade Kit. Interoperational with all Paratech Rescue Support Systems, as always.

Double Absolute Raker Set

The double absolute raker set can create an 18 ft (5,5m) vertical insertion point double raker, or be recombined to create 3 separate flying rakers with up to 40 ft (12,2m) of horizontal coverage.

High Strength Structural Kit

The Paratech High Strength Structural Kit is designed to cope with the heaviest loads seen in USAR. The HSSK combines 3 heavy duty LongShore shoring struts, the strongest shores Paratech produces, and combines them into a single shoring configuration using a simple and easy to install hand tightened tri-brace. The tri-brace ties the shores together and provides rescuers 3X the load rating listed shoring capacity of the tabulated data on the LongShore strut at a given length. The HSSK can be used to shore the extremely heavy loads at length such as replacing damaged columns in a compromised structure.

Rescue Support Systems

US&R Rescue Strut System

The US&R Rescue Strut System is one of the most complete structural collapse systems that has been standardized by the FEMA US&R teams. For any team serious about Urban Search & Rescue, this is the system to make it happen. The system includes (2) 6' Raker sets and numerous Rescue Struts and components to handle almost any disaster that the rescuers are faced with.

Vehicle Stabilization Kits

Vehicle Stabilization Kit

Paratech Vehicle Stabilization Kits have the strength and flexibility to handle any size vehicle anytime, anywhere. This includes sub compact cars, buses, cement trucks and even train locomotives. Additionally, these components provide the extra value of being completely interchangeable with your other Paratech equipment for building collapse and trench rescue scenarios. They are strong, sturdy and reliable. Paratech systems are the easiest to use and the strongest VSKs on the market today.

VSK Comparison

| | Supporter | Standard | Highway | Interstate |
|------------------------|--------------------|-------------------|-------------------|--------------------|
| Max Load | 10,000lb / 4.5TONS | 40,000lb / 18TONS | 80,000lb / 36TONS | 120,000lb / 54TONS |

| # of Ratchet Belts | 1 (Attached) | 4 | 4 | 6 |

With the highest industry safety standard, Paratech’s VSK can hold 10,000lb / 4.5TONS up to 120,000lb / 54.TONS. Paratech vehicle stabilization kits have the strength & flexibility to handle any size vehicle anytime, anywhere.

VSK V2 Controller

Safely use compressed air to extend struts! This innovative controller is capable of extending the heaviest combination of struts and extensions with a simple on / off control. Its low 29 PSI / 2Bar pressure reduction and unique automatic vent relief feature, eliminates the fear of over pressurizing in the event of a load shift, ensuring a secure and steady strut extension. Ideal for safely chasing stabilization struts while performing a lift.

MultiForce® Air Lifting Bags

Paratech's **MULTIFORCE** Air Lifting Bag takes lifting to a whole new level. Integrating the latest technology with a unique understanding of lifting, Paratech has designed the **MULTIFORCE** Air Lifting Bag to exceed expectations. Ease of use and speed of deployment make the **MULTIFORCE** Air Lifting Bag an obvious choice whether the goal is saving lives or lifting locomotives. Paratech's patented design ensures that the high lift of this system can get into the tightest places possible, while the innovative remote lifting base keeps personnel safely away from the load when positioning the **MULTIFORCE** Air Lifting Bag. A dual stage feature keeps the load steady as the bag inflates so load drift is minimized and safety relief valves are integrated into the bag itself making over-inflation completely impossible. No mechanical coupling between air chambers means a stronger and safer lift. The remote lifting base doubles as a storage device keeping the bag safe and making it extremely easy to store.

3 Kits to Fit Your Lifting Needs

Remote Placement MultiForce G3

The ultimate MULTIFORCE Bag. Comes with wheels for easy transport and telescoping pole for remote placement. There is nothing quicker or safer for lifting.

- 22-88D025G3 REMOTE PLACEMENT MULTIFORCE G3
- 22-88D025G3K REMOTE PLACEMENT MULTIFORCE G3 BAG KIT (with saddlebag control kit)
- 22-88D025G3DK REMOTE PLACEMENT MULTIFORCE G3 BAG KIT DIN (with saddlebag control kit)

Basic MultiForce G3

Comes with a Full sized Placement Base with left and right handles, but without telescoping pole and wheels. Includes carrying strap with integrated air inlet protecting feature. Order this version if the safety of remote placement is not an option you need.

- 22-88D025G3B BASIC MULTIFORCE BAG G3
- 22-88D025G3BK BASIC MULTIFORCE BAG KIT G3 (with saddlebag control kit)
- 22-88D025G3BDK BASIC MULTIFORCE BAG KIT DIN G3 (with saddlebag control kit)

Compact MultiForce G3

Comes with a reduced footprint for easier compartment storage on vehicles. Includes carrying strap with integrated air inlet protecting feature.

- 88D025G3C COMPACT MULTIFORCE G3
- 22-88D025G3CK COMPACT MULTIFORCE BAG KIT G3 (with saddlebag control kit)
- 22-88D025G3CDK COMPACT MULTIFORCE BAG KIT DIN G3 (with saddlebag control kit)

MultiForce Positioning Lights

Includes two lights: one for replacing the left handle and one for the right handle. Direct retrofit. Each 300 lumen light operates off of 2 AA batteries with a "low battery" light indicator. Up to 2 hours of continued use. Made of aircraft grade aluminum and still completely functional as lifting handles. Each light can swivel to direct the light where you want it. Light It Up!

MaxiForce® Air Lifting Bags

AIR LIFTING BAGS

MaxiForce® Has the Power To Lift or Shift Weights up to 106.7 tons

The MAXIFORCE® AIR LIFTING BAG is a thin, strong, molded envelope available in 14 different sizes. It is made from 3 layers of Neoprene covered Aramid fiber reinforcement and has the power to lift, move or shift weights up to 106.7 tons (96,8 metric tons) per bag. Control equipment and components play a critical role in successful lifting bag use and unlike other lifting bag systems, Paratech manufactures all of its major control components. This assures the quality of the lifting bag system from inflation to deflation.

What to Look for When Selecting a Lift Bag System

- SAFETY:** MAXIFORCE® Air Lifting Bags are extremely tough, made of Neoprene, embedded with three (3) full layers of Aramid fiber reinforcement on each side, giving the bags tremendous strength at full inflation. Each Air Lifting Bag has been subjected to a stringent factory pressure test to assure maximum operator safety.
- CAPACITY:** Does the height/weight capacity match the task? Non-emergency applications may only require one or two sizes. Emergency Service providers need a variety of lifting capacities.
- SHAPE:** Match the shape of the bag to the contact area of the load to maximize your effectiveness. Use rectangular shaped bags against linear loads and when lifting on hills or inclines. Square bags are great for stacking on flat surfaces. Rescue crews should have both square and rectangular lifting bags.
- THICKNESS:** The thinner the Lift Bag the better. The most notable feature of quality manufacturing is the ability to produce a thin, tough lifting bag. MAXIFORCE Air Lifting Bags range in thickness from 3/4 in (19 mm) to 1.1 in (28mm)
- MATERIAL:** Neoprene with Aramid reinforcement comprise most of the lift bag materials. These materials provide strength, durability, flexibility and chemical resistance. MAXIFORCE was the first Aramid reinforced high pressure Lift Bag.
- SURFACE:** Small molded raised bumps provide an interlocking surface for stacking 2 lift bags. Once again MAXIFORCE was the first with an interlocking surface.
- POSITIONING Webslots:** At least 2 on all Lift Bags with a 14,6 ton rating or higher. A must for rescue work. Allows for vertical placement, safe retrieval and carrying.
- MARKINGS:** Technical data is molded into the bag surface. Warnings are permanently labeled. The famous "X" marks the center of the load.
- AIR INLET:** Brass with maximum pull strength. The inlet is threaded to receive a brass inflation nipple. Why brass? No corrosion. Easy to repair.
- WORKS QUIETLY:** Completely silent in use. There are no engine sounds or loud mechanical noises when MAXIFORCE is used.

PRESET PRESSURE REGULATOR
Same Precision Functionality, Now with:

1. Increased durability

3. Easier to use

COMPACT DESIGN
Integrated Gauge Light
Easy Operation
Safety Couplings
Fully Enclosed Gauges

DUAL DEADMAN 180PSI/12,4BAR CONTROLLERS

This controller will 'go anywhere'. It is compact and extremely portable. Rescue personnel can crawl into collapse areas without hindrance. There are no protruding joysticks or cumbersome enclosures. The push-button design must be depressed for inflation or deflation. Color coded gauges make it easy to read. Relief valves and open couplings are built in the controller for maximum safety.

Man & Machine Kit

Paratech's man & machine kit covers areas of production, maintenance and rescue. The air lifting bags and control equipment (all contained in one convenient package) included in the kit are so versatile and easy to use that you will wonder what you did before you had them!

Air Hoses

A full 3/8 in / 9,5 mm inside diameter in a wide range of colors and lengths. Couplings and nipples are field replaceable using simple hand tools. Working pressure of 300 psi / 20,7 bar assures reliability. Hose stays flexible over the full operating temperature range of the lift bag. Closed couplings prevent air escape at disconnect (no blowing debris).

MaxiForce® Air Lifting Bags

Rescue Air Cushions

Ideal Tool for High Lift Requirements of Non-Reinforced Broad Surfaces Found on Trucks, Vans & Light Aircraft.

Rescue Air Cushions are an ideal tool for high lift requirements of non-reinforced broad surfaces found on trucks, vans and light aircraft. Cushions are also used by collapse rescue teams to fill voids and regain support for Rescue Struts, wall braces and shoring. With a maximum lift height up to 40 inches (102 cm), Rescue Air Cushions are available in 4 sizes.

Paratech's Rescue Air Cushions are ready for a wide range of applications and are extremely versatile.

Trailer Lift

Vehicle Lift

Rescue Air Cushions are available in 4 sizes for maximum versatility and a wide range of applications.

Typical Applications Include:

- Major vehicle accidents (cars, trucks, buses)
- Light aircraft recovery
- Filling voids created in trench collapse
- Small vehicle turnovers
- Downed or trapped animals
- Flotation device
- Industrial lifting applications

A soft footprint allows placement on soft and uneven terrain, with a contact area exceeding lifting height.

Constructed with a highly durable contact area, Rescue Air Cushions have neoprene coated exterior and interior reinforcement belts.

Vehicle Lift

Trailer Lift

Safety And Operational Features:

- Pressure relief valves on cushions and control valve
- Interior reinforcing maintains flat lift surfaces for direction of lift force
- Quick connect couplings with locking ring
- Positioning handles
- Each cushion is factory tested at 1.3 times operating pressure
- Contact area diameter exceeds lifting height
- Operating pressure of 0-14.5 psi / 1,0 bar aramid reinforced

Advantages:

- Lifting heights from 17 in to 40 in / 43 cm to 102 cm
- Greater stability due to the size of the contact area
- Lighter loads have predictable lift results
- Full lift capacity over full lifting height
- Soft footprint allows placement on soft and uneven terrain
- User repairable for limited damage or punctures
- Four sizes to choose from

Ease of Operation:

Air Cushion inflation can be made from a variety of compressed air sources:

- Industrial compressed air
- Compressed air storage cylinders
- Air brake systems
- Portable blowers

Portable, hand held controller includes adjustable valves, gauges and pressure reliefs

Forcible Entry Tools

For more than 60 years Paratech has set the standard for high quality heavy-duty forcible entry tools. These tools are designed to pry, pound, puncture, twist and cut open or remove all types of barriers between emergency personnel and the life they are saving. From our popular full line of Hooligan Tools to our powerful Percussive Rescue Tool (PRT), to our compact & versatile Pry-Axe...Paratech has led the way in design and manufacturing of dependable and unstoppable forcible entry tools.

Hooligan Tool

Setting the standard of excellence for Halligan type tools, the heavy duty Paratech Hooligan tools have features such as a stress proof bar, lightweight aluminum handles with machine grooved hand grips and gently curved claws that maximize prying leverage. Paratech also offers the SPF, a single piece forged Hooligan, a top choice by many.

Personal Entry Tools

Paratech offers 3 different types of personal forcible entry tools, the Pry-Axe, Biel Tool, and the TiTAN Crash Axe. The Pry-Axe has an extendable claw to offer the powerful 'Slam & Ram' capability for quick and decisive entry in tight quarters. The claw can be removed and inserted into the keyway in the axe head for twisting leverage.

PRT Percussive Rescue Tool

The PRT is a powerful hand held rescue tool that can be put to work with a minimal amount of training. The 'Slam & Ram' action of the PRT directs all of its force directly at the point of impact, without deflection, making it safer and more effective than a sledge and wedge.

Hooligan Tool

The Hooligan Tool is one of the world's most popular forcible entry tools. These heavy-duty tools were designed to pound, puncture, pry, twist, and cut all types of barriers encountered by emergency service personnel. The head and claw are forged from high alloy steel, heat treated for maximum strength, then fitted to a 1" (2.5 cm) stress proof bar. The bar has machine grooved non-slip grips. The Hooligan Tool features a claw that is gently curved for maximum prying leverage. The claw opening is parallel and fits over locks, hasps and many door bars. It can also be used as a nail puller and a gas shut off during emergencies. The "Highway Hooligan Tool" features a metal cutting claw with a machine sharpened metal cutter that uses the can opener principle to cut heavy gauge metal and composites.

Recommended Users

- Fire Departments
- Law Enforcement Agencies
- Rescue Squads
- Hazmat Teams
- Plant/Refinery Maintenance Crews
- Military and Public Utilities

Standard Claw:

Parallel opening for gas valve shutoffs, locks and hasps. Machine sharpened claws. Recessed nail puller. Claw radius for prying leverage.

Metal Cutting Claw:

Combines the capability of prying and metal cutting. Machine sharpened metal cutter uses can opener principle to cut heavy gauge metal and composites.

Pry-Axe

Here is a tool that has withstood the test of time. For over 40 years the Pry-Axe has remained the best selling tool in our line. The Pry-Axe is being used by fire departments, police departments and rescue squads worldwide.

The Pry-Axe is a lightweight, multi-purpose, 'Slam & Ram' tool designed to pry, enlarge openings, cut sheet metal and twist off locks and latches. This efficient tool lets every firefighter force entry, rescue and ventilate without waiting for help. The Pry-Axe is small enough to carry and rugged enough for most jobs.

The Pry-Axe head and claw assemblies are separate sections forged from high alloy steel and heat treated for maximum strength. A molded rubber sleeve over the handle provides a non-slip grip. The Pry-Axe is electroless nickel plated for good looks and easy maintenance.

'SLAM AND RAM'

Action of the PRT directs all of its force directly at the point of impact

The PRT is a powerful hand held rescue tool that can be put to work with a minimal amount of training. Primarily designed for fast, forcible entry, one person can quickly pry open locks and doors in seconds and easily break through brick and concrete block walls within a few minutes.

The 'Slam & Ram' action of the PRT directs all of its force directly at the point of impact - without deflection, making it safer and more effective than a sledge and wedge.

This heavy duty rescue tool is easily stored and transported, so it can always be... the first tool to the rescue.

Powered Impact Tools

Powered Impact

From Breaking Concrete, to Cutting the Remains of a Melted Tanker Shell Apart, it Delivers the Punch.

PAKHAMMER

At only 11.3 lb / 5.1 kg and at 1000-1100 high impact blows per minute this PIT dramatically increases the range of rescue work for initial responding units

Made from S7 tool steel and heat treated for long life, all PIT kits come equipped with a wide variety of standard and specialized tool bits.

Powered Impact Tools

Paratech's Powered Impact Tools (PIT) are designed for forcible entry during fire fighting and rescue operations. They are used for cutting metal and composites, breaking masonry walls, penetrating concrete floors, forcible entry and digging during tunneling operations. Paratech's PITs consume air only on the power stroke. This unique, patented design provides a pneumatic impact and penetrating device with an adjustable power output and very low air consumption.

The combined features of light weight, very low air consumption and a wide range of power settings make Paratech's Pakhammer extremely effective for rescue and fire fighting operations.

Rescue workers may find themselves temporarily blocked by a masonry wall or faced with the need to penetrate a concrete floor. Building collapse often requires power assisted digging for access to victims.

CRASH RESCUE FROM AIRCRAFT:

Cut skins, spars, canopies.

CRASH FIRE FIGHTING:

A 1000–1100 high impact blows per minute, 11 pound impact tool that dramatically increases the range of forcible entry and rescue work initial responding units can handle without calling up heavy equipment. The Pakhammer is the only pneumatic impact tool of its size that is designed to operate from portable air cylinders. It is an ideal tool for bus and train rescue, high rise work, collapse rescue or any situation that requires a powerful impact tool that operates from a limited air supply.

This multipurpose kit is designed to handle numerous functions in ARFF. Includes a cutting bit designed to cut aircraft windshields and canopies, a cutting bit to cut sheet metal, a plug driver bit and neoprene plugs for leak sealing, piercing nozzle that can penetrate the GLARE composite skin as well as, CFRP (Carbon Fiber Reinforced Plastic). The 14" Piercing nozzle can flow water or chemical firefighting agents like foam etc. to help put out fires. This Grab and Go kit also includes the Paratech Pakhammer, designed to use with a limited air supply, uses less air and hits harder than any other tool of its kind and can go much longer before an air change is needed. Other pieces of equipment in this versatile kit are an adjustable regulator that can operate the tool at a range of 40 psi to 200 psi.

Damage Control Systems

Damage Control System (DCS)

Direct Compression

I-Type, can be used vertically or horizontally and is the simplest and strongest as it is parallel to the load axis (see table).

Cross-Axial

H-Type, can be used vertically or horizontally and takes moderate pressure (see table) as the pressure acts perpendicular to the load axis.

Triangulation

K-Type, can be used vertically or horizontally and takes full pressure (see table) as the pressure acts parallel to the load axis.

The most important factor you get with Paratech's DCS is time! With incoming water comes increasing depth and with that, higher water pressure...one of the most unforgiving vicious cycles has begun. To break the cycle you need time...time to build shoring that can slow the incoming water enough for the pumps to keep up...

The Paratech Damage Control System will provide that break.

The Paratech Damage Control System (DCS) brings maritime damage control shoring into the 21st century. Speed, strength, flexibility and capability are the hallmarks of Paratech's DCS. Everything about the system has been engineered to simplify the difficult task Damage Control Teams have to face in the harsh and often dangerous working environments they have to perform in. With the Paratech DCS you will achieve setup speeds never seen with any wood-based system. A standard K brace can be set and fitted within one minute by an experienced team. The system is very logical and user-friendly for unexperienced crew members as well. All components of Paratech's DCS are machined from aircraft grade aluminum for superior strength and hard-coat anodized for maximum salt-spray protection. Designed to last and perform, the DCS makes damage control shoring faster, safer and easier than ever before.

Shoring

Placing support against, beneath or above the damaged areas and preventing additional sagging, bulging and metal fatigue.

Our products are designed to be used in situations that often result in the saving of lives, the prevention or reduction of bodily injuries, the preservation of our environment, and the protection of property. Unfortunately, many of these incidents go unnoticed and are quickly forgotten.

Paratech would appreciate you taking a few moments to share these incidents with us by completing the Rescue Award application and filling out our online application at <https://www.paratech.us/submit-rescue-award> . We will send each active participant of your rescue our distinctive Rescue Award emblem and certificate. A separate award will be awarded in the name of the individual's unit.

The Rescue Awards we offer correspond to our main product groups:

- RSS - Rescue Support Systems
- MAXIFORCE® & MultiForce® - Air Lifting Bags
- RAC - Rescue Air Cushions
- PIT - Powered Impact Tools
- FET - Forcible Entry Tools
- DCS - Damage Control System

There is no limit to the amount of awards you may apply for. Paratech hopes you will apply after each and every incident involving the successful use of a Paratech product. Each award application we receive is shared with our employees and will be posted on our website for the world to see your accomplishments using Paratech equipment. The awards you receive are a tremendous source of pride for all of us here at Paratech.
